Our SOLUTIONS

Advantages

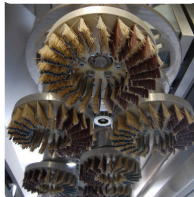

Brushing system made and designed by PolishStyl is quick, efficient and economic solution to sand various materials. Thanks to the optimized parameters of our abrasive brushes and careful selection of raw materials we are able to handle the most difficult and untypical challenges. With many years of experience we can develop and provide any sanding tool.

Application

Advanced composites, wood and metal

Example

Sanding of carbon fiber helmets - scan and watch video

About POLISHSTYL

The PolishStyl company was established in January 2008 in Poland. The company's factory is located in Nowa Dęba in the Podkarpacie region. PolishStyl is one of the most important suppliers of abrasive materials in Poland and abroad. It has gained the trust of a wide range of customers - from small and medium-sized plants to the largest factories all over the world.
